THE HEALTHCARE E-LEARNING COMPANY

MOSBY'S ESSENTIAL NURSING CE: E-LEARNING COURSE MEETS FULL RANGE OF CONTINUING EDUCATION NEEDS

The demands facing nurses continue to multiply as the care process becomes more integrated and complex. Today's emphasis on evidence-based practices and advanced technologies requires not only new skill sets, but very often, autonomous critical thinking and decision-making at the point of care.

MC Strategies understands the rapid changes that have swept healthcare in recent years. Our parent company, Elsevier, is the world's leading publisher of healthcare and scientific information, including Mosby's world-famous nursing textbooks and e-learning tools. That's why we're uniquely equipped to offer the most comprehensive and up-to-date continuing education (CE) courses for nurses on the market today.

› **Grounded in Professional Standards**

The entire Mosby's Essential Nursing CE curriculum has been developed within the framework of existing regulatory and professional practice standards. This feature — unique in the e-learning industry — means that each and every lesson is mapped to specific Joint Commission accreditation standards as well as professional nursing specialty practice standards.

As a result, Mosby's Essential Nursing CE offers a clear focus not only for individual nurses advancing their knowledge and skills, but also for the entire nursing organization when tackling Joint Commission performance improvement requirements or pursuing the path to Magnet Recognition. In fact, the Forces of Magnetism at the heart of the Magnet Program are identified and supported across the full range of Essential Nursing lessons. The course's lesson alignment with professional standards provides critical guidance for nurse leaders when it comes to addressing both individual and department-wide continuing education needs.

› **Peer Reviewed and Evidence Based**

Mosby's Essential Nursing CE is a broad curriculum of 103 lessons that covers the full spectrum of critical nursing knowledge and skill for safe practice. This self-directed, Internet-based learning program provides 158.6* contact hours and delivers current best practice information on an array of topics, ranging from ethics and legal issues to diseases and conditions and much more.

The lessons have been developed through a rigorous, peer-reviewed process that emphasizes evidence-based practices, a process that is sustained through continual updates as new information becomes available. And because the courses can be bundled into lesson suites, they allow for focused, in-depth education in specific areas, including pain management, shock, patient safety, end of life, medication safety, and infection control.

› **Individualized Learning**

With MC Strategies' Learning Management System, users benefit from the industry's most powerful and flexible e-learning platform. Each Essential Nursing lesson can be viewed and selected through a variety of prisms, including by standards, by body system, or by nursing specialty. In addition, all lessons incorporate a full range of interactive multimedia tools, including animation, audio, video, slide shows, tables, and charts. And each course likewise includes a variety of self-check tools that reinforce knowledge application and enhance critical thinking and independent decision-making at the point of care.

Whether your educational objectives are driven by regulatory mandates, accreditation and certification requirements, Magnet Recognition, or simply a commitment to nursing excellence, there's only one e-learning course that can fully meet your needs. Contact MC Strategies today to learn how, together, we can strengthen the foundation of knowledge upon which quality care depends.

Diseases and Conditions

- Acute Renal Failure
- Adjuvant Therapies for Neuropathic Pain
- Anterior Wall Myocardial Infarction
- Antithrombotic Therapy
- Atrial Fibrillation
- Bioterrorism Agents
- Cardiogenic Shock
- Chemical Emergencies
- Chronic Obstructive Pulmonary Disease
- Chronic Renal Failure
- Complementary and Alternative Therapies
- Dementia, Delirium, and Depression
- Emerging Infections
- End of Life Symptom Management I
- End of Life Symptom Management II
- End of Life Symptom Management III
- Gerontologic Pain Management
- Hemorrhagic Stroke
- Hepatitis
- Hospitalized Patient with Dementia
- Hospitalized Patient with Heart Failure
- Ischemic Stroke
- Latex Allergy
- Managing Post Operative Hyperglycemia
- Neurogenic Shock
- Nonpharmacologic Pain Management
- Pain Physiology and Pathology
- Palliative Care
- Pediatric Hypovolemic Shock
- Pediatric Pain Management
- Pediatric Sepsis
- Pneumonia
- Pressure Ulcers
- Radiological and Nuclear Emergencies
- RV/Inferior AMI
- Surgical Site Infection
- The Basics of Disaster Management: Before, During and After an MCI
- Tuberculosis
- Venous Thromboembolism
- Wound Care: Diabetic Foot Ulcer
- Wound Care: Dressing
- Wound Care: Grafts and Flaps
- Wound Care: Venous Stasis Ulcers

Ethical and Legal

- Child Sexual Abuse
- Dealing with Toxic People
- Domestic Violence
- Elder Abuse
- Ensure Informed Consent
- Exploring Ethical Dilemmas
- Impaired Nurse
- Infusion Therapy: Legal Issues
- Mastering Delegation

- Palliative Care
- Sexual Assault
- Sexual Harassment: Maintaining Respectful Work Environment
- The Advance Directive: Equipping Patients for Self-Determination

Infection Control

- Central Venous Access Infection
- Emerging Infections
- Hepatitis
- Pediatric Sepsis
- Pneumonia
- Pressure Ulcers
- Severe Sepsis and Septic Shock
- Surgical Site Infection
- Tuberculosis
- Urinary Tract Infection
- Ventilator-Associated Pneumonia

Leadership and Management

- Clinical Decision Making
- Conflict Resolution
- Creating Health Workplaces
- Dealing with Toxic People
- Failure Mode and Effect Analysis
- Impaired Nurse
- Managing a Diverse Generational Staff
- Negotiating : Managing Conflict and Resolving Problems
- Root Cause Analysis
- Sexual Harassment: Maintaining Respectful Work Environment
- Workplace Violence

Medication Safety

- Communicating /Transcribing Med Orders
- Infusion Therapy: Pediatric Safety
- Moderate Sedation
- Polypharmacy in the Elderly
- Safe Use of Insulin
- Treating Pain with Nonopioids
- Use of Opioids in Pain Management

Patient Safety

- Anaphylactic Shock
- Child Sexual Abuse
- Dementia, Delirium, and Depression
- Domestic Violence
- Elder Abuse
- Failure to Rescue
- Hospitalized Patient with Dementia
- Impaired Nurse
- Infusion Therapy: Pediatric Safety
- Moderate Sedation
- Pain Management with Addictive Diseases
- Physical Restraints

- Polypharmacy in the Elderly
- Pressure Ulcers
- Sexual Assault
- Transfusion of Blood and Blood Components
- Urinary Tract Infection
- Ventilator-Associated Pneumonia

Procedures and Skills

- Arterial Blood Gas Interpretation
- Autotransfusion
- Cardiac Assessment
- Communicating /Transcribing Med Orders
- Enteral Nutrition
- Failure to Rescue
- Fluid Resuscitation
- Gastrointestinal Assessment
- Hemodynamic Monitoring Waveform Analysis
- Lab Data Interpretation: CBC with Differential
- Lab Data Interpretation: Serum Chemistries
- Mechanical Ventilation I
- Mechanical Ventilation II
- Moderate Sedation
- Musculoskeletal Assessment
- Neurologic Assessment
- Organ Donation
- Ostomy Care Management II
- Ostomy Care Management I
- Pain Assessment
- Parenteral Nutrition
- Pediatric Assessment
- Physical Restraints
- Pressure Ulcers
- Respiratory Assessment
- Sexual Assault
- Transfusion of Blood and Blood Components
- Wound Care: Diabetic Foot Ulcer
- Wound Care: Dressing
- Wound Care: Grafts and Flaps
- Wound Care: Venous Stasis Ulcers

Workplace Environment

- Conflict Resolution
- Creating Healthy Workplaces
- Dealing with Toxic People
- Impaired Nurse
- Latex Allergy
- Managing a Diverse Generational Staff
- Negotiating: Managing Conflict and Resolving Problems
- Sexual Harassment: Maintaining Respectful Work Environment
- Workplace Violence
