Mosby’s Neonatal Nursing Course is an innovative and interactive online program developed specifically for nurses working in the neonatal setting — including new and experienced nurses — as part of their orientation program and continuing education. This blended-learning program consists of 34 online modules that correspond to reading assignments in a companion online manual. To enhance learning and provide further explanation of content, each module provides links to additional resources, including drug information and policies and procedures.

The course includes a variety of creative learning modes that helps nurses participate as active learners.

**This engaging program includes:**
- video clips
- animations
- photos
- interactive exercises with immediate feedback and rationales

Mosby’s Neonatal Nursing Course is presented in an organized and concise fashion and focuses on the essentials of neonatal nursing practice that nurses must know to demonstrate competency in their role. In addition, nurses will have the opportunity to earn up to 54 continuing nursing education contact hours through Elsevier/Mosby.*

**Benefits:**
- Provides competency-based education through guided-learning experiences
- Affords experienced nurses the opportunity to refresh their knowledge and skills and earn continuing education contact hours for license renewal or professional recertification
- Decreases the amount of time an assigned preceptor must devote to face-to-face instruction by offering self-paced, convenient learning
- Unique, web-based approach offers course access 24 hours a day, 7 days a week

**Self-check activities include the following:**
- Case Studies
- Drag-and-Drop
- Fill-in-the-Blank
- Line Matching
- Multiple Choice
- True/False

Elsevier/Mosby is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center’s Commission on Accreditation.

High-Risk Perinatal Issues
• Maternal-Fetal Surveillance and Interventions
• Regionalization and Neonatal Transports

Concepts of Neonatal Care
• Delivery Room Stabilization
• Newborn Assessment
• Neonatal Thermoregulation
• Concerns of Prematurity

Body Systems
• Pulmonary System and RDS
• Pulmonary System: PPHN/MAS/ECMO
• Pulmonary System: Mechanical Vents
• Pulmonary System: Arterial Blood Gas
• Pulmonary System: Chest Tubes-Air Leaks
• Pulmonary System: BPD
• Cardiac: Fetal/Neonatal Circulation
• Cardiac: Assessment/Heart Sounds/Murmurs
• Cardiac: Heart Failure
• Cardiac: Congenital Heart Defects
• Gastrointestinal System
• Neurologic System
• Genital System
• Urinary System
• Integumentary System
• Hematologic:Jaundice/RBC and Platelet Disorders
• Hematologic:Blood Incompatibilities/Hydrops

Nutritional Issues
• Fluids, Electrolytes, and Nutrition
• Preparation for Venous Access in the Neonate
• Venous Access in the Neonate
• Infant Bottle Feeding
• Lactation and Breastfeeding

Neonatal Infection
• Newborn Infection

Pain Management/Paralytic Agents
• Pain

Developmental Care
• Neuromotor Development
• NICU Environment/Kangaroo Care/CoBedding

Family-Centered Care
• Transition to Home
• Palliative Care
