

INTRODUCING – CPT® CODING

EDUCATION BY NATIONALLY RECOGNIZED EXPERT CAROL BUCK

MC STRATEGIES IS PROUD TO ANNOUNCE THAT BUCK'S COMPREHENSIVE CPT® EDUCATION IS NOW PART OF OUR EDUCODE® CODING CURRICULUM

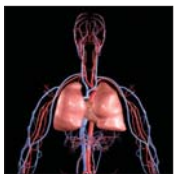

This curriculum takes a practical approach to training learners for a successful career in medical coding. It begins with an introduction to **Current Procedural Terminology (CPT®)**, followed by in-depth explanation of the sections found in the CPT® manual. Organized by body systems to follow the CPT® codes, several chapters introduce various procedures and demonstrate how to code each one. Practice exercises following each "step" of information and at the end of each course reinforce important concepts and allow learners to check their comprehension.

Concise lessons incorporate figures, photographs, slide shows, links to relevant web sites, key concepts/terms linked to course glossaries, and exercises to reinforce key concepts.

The program also includes a variety of self-study interactive activities including unique case-based exercises designed specifically for medical coding. Each lesson includes a post test designed to summarize key concepts of the lesson. Each course also ends in a "review" lesson designed to give the learner additional practice with theory, practical and report exercises.

Value/benefits of on-line lessons include:

- Lessons available 24/7 for learners to work at their own pace
- Average lesson times are 30-45 minutes, with bookmarking functions to start where you left off
- Continuing education credits
- Comprehensive general and specialty curriculum
- Real time updates
- Automatically or manually prescribed training
- Lesson planning
- Advanced reporting for learners and managers
- Personal pages where learners and managers can post events and monitor progress

Here is just an example of the courses this curriculum has to offer:

- Introduction to CPT®
- CPT® Modifiers
- Introduction to the Surgery Section
- The Medicine Section
- Level II National Codes
- Anesthesia Section
- The Integumentary System
- The Musculoskeletal System... and more

TAKE A PEEK AT THE TYPE OF LESSONS WITHIN EACH COURSE:

The Respiratory System

- › Introduction to the Respiratory System
- › The Nose and Nasal Procedures
- › Accessory Sinuses and Larynx
- › Trachea/Bronchi and Lungs/Pleura
- › Pulmonary Medicine
- › Septoplasty
- › Thoracentesis
- › Tracheostomy
- › Endoscopic Procedures
- › Course Review

The Cardiovascular System

- › Introduction to the Cardiovascular System
- › Cardiovascular Coding in the Surgery Section Part I & II
- › Cardiovascular Coding in the Medicine Section
- › Cardiovascular Coding in the Radiology Section
- › Cardiac Artery Bypass Grafts
- › Pacemaker
- › Stress Tests
- › Cardiac catheterization
- › Miscellaneous Reports
- › Course Review

Our content is powered by MC Strategies' comprehensive learning management system which is specifically designed for healthcare. Our LMS, the first LMS to carry the HFMA Peer Reviewed designation, not only delivers and tracks e-learning, but also schedules and generates reporting for all your other learning activities, including classroom training, outside seminars, skill checks and competencies.

CAROL J. BUCK, MC, CPC, CPC-H, CCS-P
