About MC Strategies

Since 1986, MC Strategies, Inc., parent company to JEMSprepare, has been providing healthcare organizations like yours with integrated solutions that provide training and promote professional development of nurses, financial managers, HIM professionals, and coders, as well as other healthcare professionals on your staff, leading to improved patient care and an enhanced revenue cycle.

Our company began by offering coding and reimbursement consulting services. Although we no longer offer consulting services, MC Strategies has grown to meet the changing needs of the healthcare industry. Consequently, when desktop computer technology became commonplace in the 1990s, we launched our computer-based training. In addition, when the Internet reached critical mass and public acceptance, we were ready with our e-learning division.

We offer education for the beginner as well as the advanced learner. Building strategic alliances with partners such as **HFMA and Elsevier**, MC Strategies has created comprehensive educational solutions that address revenue cycle business needs across the entire enterprise. These solutions integrate learning that improves organizational performance with the added flexibility to customize policies and procedures specific to your facility. Topics include **coding, practice management, documentation, billing, compliance** and more.

With our acquisition by Elsevier in 2005, we broadened our network of resources, including the content experts and thought leaders published with Elsevier imprints Mosby and Saunders. This has allowed us to expand our courseware selection and ensure its timeliness. For example, we now offer **Emergency Nursing Triage** in conjunction with the Emergency Nurses Association. This course prepares triage nurses to make the right decisions. We also offer **ReadyRN: Disaster Nursing and Emergency Preparedness** to enhance nurses' sense of clinical competence and personal safety and **Mosby's Essential Nursing CE** program, with CE topics that link to regulatory and professional standards. Many of our courses offer nurses an opportunity to earn continuing nursing education contact hours provided by Elsevier/Mosby Office of Nursing CE.

All of our lessons are powered by MC Strategies' learning management system (LMS), developed specifically to bring interactive e-learning solutions to hospitals and to provide healthcare e-learning solutions that will impart knowledge, test understanding, and assess performance to meet regulatory, organizational, and professional practice solutions.

Our LMS not only delivers and tracks e Learning, but also schedules, tracks and generates reporting for all your other learning activities, including classroom training, outside seminars, skill checks and competencies. Our LMS is the first healthcare learning solution with the designation Peer Reviewed by HFMA.

Since its inception, MC Strategies has been on the leading edge of the healthcare e-learning field and we will continue to bring our clients the best and most progressive integrated training solutions necessary to meet their needs.

About Our Learning Management System

With a hosted solution from MC Strategies' learning management system, you are getting an LMS that frees you from the headaches of administering yet another server and troubleshooting more applications. Use your valuable time focusing on your organization's mission of providing patients with the very best healthcare possible. With our LMS, you will eliminate worries about uptime, upgrades, bandwidth and security. MC Strategies will ensure that your learners always have access to the courseware and support they need, thus improving your employees' skills.

We use the most advanced technology to ensure that our servers offer maximum up time and are virus, malware and spyware free. MC Strategies' redundant servers ensure that your data is secure and available anywhere at any time.

Being SCORM and AICC compliant allows you to reuse and repurpose courseware from third parties, which coupled with our wealth of content, provides learners access to the most comprehensive library in healthcare. You can link internal documents easily and seamlessly, customizing lessons to fit your specific location or situation. Our courses are usable even for those on dial-up connections.

Powerful, yet simple and intuitive management features allow instructors to customize or create their own courseware, track learner progress and centrally document training efforts. Because our LMS is such a powerful platform, you do not need expensive or "buggy" plug-ins, though you may optionally utilize Flash, typically pre-installed on browsers today.

MC Strategies has more experience in e-Learning than anyone else in the healthcare field. This experience has made us the leader in not only providing the best and most comprehensive LMS, it also means we have the most experience in implementation, content development and security.

The screenshot displays the ENA Respiratory Emergencies game interface. At the top, there's a navigation bar with 'MENU', '5 OF 19', 'PREVIOUS', and 'NEXT'. Below that, a 'Reading Assignment' section is visible. The main game area features a grid of question values: \$200, \$400, \$600, and \$800, categorized under 'Identify', 'Assess', 'Treat', and 'Surprise'. A 'SCORE' display shows '\$0'. A 'Bronchial' animation window is open, showing a diagram of the lungs with a stethoscope and a graph of findings. The graph shows a peak labeled 'Findings: Bronchial'.

Three screens from the Emergency Nursing Orientation Online Course. Self-check activities such as the game shown here keep learners engaged.

Our courses typically feature multimedia elements, including this example of bronchial lung sounds.

Combating Terrorism in Healthcare (from TigerSix, Inc.)

Total Lessons: 27

Terrorist Threat Conditions: How to Respond
 Reducing the Opportunity for Terrorism
 Preparation is everything
 Vulnerability Assessment: Security Force Personnel
 Vulnerability Assessment: Security Force Training
 Vulnerability Assessment: Security Force Equipment
 Vulnerability Assessment: Security Standard Operating Procedures
 Vulnerability Assessment: Communication and Response System
 Vulnerability Assessment: Healthcare Staff
 Vulnerability Assessment: Hospital Recognition and Community Impact
 Vulnerability Assessment: Security Assessment
 Vulnerability Assessment: Personnel
 Vulnerability Assessment: Vehicles, Parking Lots and Garages
 Vulnerability Assessment: Landscape Analysis
 Vulnerability Assessment: Hazardous Materials
 Vulnerability Assessment: Contingency Planning
 Vulnerability Assessment: Information Technology
 Vulnerability Assessment: Vendors and Delivery Process
 Vulnerability Assessment: Incoming Mail
 Weapons of Mass Destruction - The Medical Response Guide: Overview
 Weapons of Mass Destruction - The Medical Response Guide: Chemical Weapons
 Weapons of Mass Destruction - The Medical Response Guide: Biological Weapons
 Weapons of Mass Destruction - The Medical Response Guide: Radiological Weapons
 Weapons of Mass Destruction - The Medical Response Guide: Nuclear Weapons
 Weapons of Mass Destruction - The Medical Response Guide: Responding
 Condiciones de la Amenaza Terrorista- Como Responder
 Reduciendo la Oportunidad al Terrorismo

Emergency
Preparedness

Community Emergency Preparedness Training

Total Lessons: 204

National Incident Management System (NIMS) (8 lessons)
 Multi-Hazard Emergency Planning for Schools (7 lessons)
 Combating Terrorism in Healthcare by Tiger Six, Inc. (27 lessons)
 Examples of Custom Lessons (i.e. Emergency Medical Services, Hospital Security, Hospital Hazard, School Safety, Police, etc.) (162 lessons)

EMS Continuing Education Courses (from Journal of Emergency Medical Services, UTSWMC, MCG, & Mosby)

Total Lessons: 125

ALS- Airway Breathing and Cardiology (12 lessons)
 ALS- Obstetrics and Pediatrics (3 lessons)
 ALS- Trauma (7 lessons)
 ALS- Medical Emergencies (21 lessons)
 BLS- Airway (6 lessons)
 BLS- Medical/Behavioral (16 lessons)
 BLS- OB, Infants, & Children (4 lessons)
 BLS- Patient Assessment (2 lessons)
 BLS- Preparatory (2 lessons)
 BLS- Trauma (6 lessons)
 BLS- Electives (7 lessons)
 MSG-EMS CEU Lectures

Course Listing (cont.)

EMS Continuing Education Courses (from Journal of Emergency Medical Services, UTSWMC, MCG, & Mosby) *continued*

Total Lessons: 125

UTSWMC paramedic Lecture Series (**22 lessons**)
Mosby-MCS EMS Courses (**1 lessons**)

Blood & Airborne Pathogens

Total Lessons: 1

Mosby's ECG Interpretation

Total Lessons: 18

Overview of the Heart (**3 lessons**)
Understanding Cardiac Dysrhythmias (**11 lessons**)
Introduction to 12-Lead ECG Analysis (**3 lessons**)
Rhythm Interpretation for Monitor Technicians (**1 lesson**)

Multidisciplinary

Apex impULSE ECG

Total Lessons: 7

Heart Basics
Obtaining ECGs and Troubleshooting
Heart Rhythms and Interventions
12 Lead ECGs
Acute Coronary Syndrome
Advanced and Special Situations
Reference Library

Additional Courses Available

AACN: Essentials of Critical Care Orientation (ECCO)
AACN: Basic ECG Interpretation
HFMA HIPPA
Joint Commission / OSHA Compliance

Content Partners

MC Strategies is strategically partnered with key healthcare content providers. These partnerships enable us to jointly develop courses that can be delivered by our learning management system.

American Hospital Association (AHA)

AHA is the national organization that represents and serves all types of hospitals, healthcare networks and their patients and communities, including 5,000 hospitals, health care systems, networks, other providers of care and 37,000 members.

Emergency Nurses Association (ENA)

ENA is a professional member organization recognized internationally for promoting excellence in emergency nursing through leadership, research, education, and advocacy. The Association actively collaborates with other health-related organizations to improve emergency care, including identifying and disseminating information on key trends affecting and pertinent to emergency nursing.

American Association of Critical-Care Nurses (AACN)

MC Strategies and AACN are committed to providing the highest quality training resources to maximize your nursing staff's contribution to patient care, improving the health of critically ill patients and providing the necessary consideration for their families. Together, we offer the Essentials of Critical Care Orientation (ECCO) e-learning program to aid in the continued education of critical care nurses.

Healthcare Financial Management Association (HFMA)

The nation's leading membership organization for healthcare financial management professionals, HFMA brings perspective and clarity to the industry's complex legislative and financial management issues.

USA Prepare

USA Prepare in conjunction with Elsevier Public Safety offers JEMSprepare, a comprehensive online Continuing Education solution for EMS providers worldwide. Together we deliver lessons developed with our extended partners including National Disaster Life Support Foundation (NDLSF), Medical College of Georgia (MCG), Previstar, and EM Assist.

TigerSix, Inc.

TigerSix combines the skill, knowledge and experience of former military members, law enforcement officers and Federal Task Force experts with real world experience in anti-terrorism, intelligence, counter-intelligence, special operations, and related disciplines in an effort to reduce terrorist attacks.

University of Texas Southwestern Medical Center

The lectures are based upon the clinical experiences of paramedics, emergency nurses and emergency physicians. Course materials are presented in a variety of manners to engage the wide breadth of continuing education learning stimulation. Lessons combine the instructor's lecture with relevant graphics and on-screen animations, presented full screen with MP3-quality audio. Just like traditional lectures, students will see the course materials and examples while the instructor explains the concepts.

Distribution Partners

MC Strategies has distribution partnerships with leading content providers, allowing us to deliver accredited, expert-authored e-learning solutions through our learning management system, specifically designed for healthcare. Our LMS not only delivers and tracks e-Learning, but also schedules, tracks and generates reporting for all your other learning activities, including classroom training, outside seminars, skill checks and competencies. It is the first and ONLY learning management system with the designation Peer Reviewed by HFMA.

American Association of Critical-Care Nurses (AACN)

MC Strategies and AACN are committed to providing the highest quality training resources to maximize your nursing staff's contribution to patient care, improving the health of critically ill patients and providing the necessary consideration for their families. Together, we offer the Essentials of Critical Care Orientation (ECCO) e-learning program to aid in the continued education of critical care nurses.

American Hospital Association (AHA)

Through a strategic relationship with the AHA, MC Strategies offers a series of WebInservice® lessons based on coding issues discussed in each release of AHA Coding Clinic for ICD-9-CM and AHA Coding Clinic for HCPCS. These lessons ensure that your coding staff has access to the latest coding and regulatory changes and full understanding of their impact. We also offer an online version of the Faye Brown Coding Handbook. All of this helps you and your coding staff to reduce the risk of coding errors, creates cost savings, enhance patient / employee satisfaction and improve patient care

USA Prepare

USA Prepare in conjunction with Elsevier Public Safety offers JEMSPrep, a comprehensive online Continuing Education solution for EMS providers worldwide. Together we deliver lessons developed with our extended partners including National Disaster Life Support Foundation (NDLSF), Medical College of Georgia (MCG), Previstar, and EM Assist.

MindLeaders

MindLeaders is a global leader in the development of e-learning content known for the excellence of their training content in the areas of professional development, management skills and computer applications. Their innovative use of blended learning combines web-based training with video streaming and scenario-based training to enhance the learner's experience.

Apex Innovations

Apex Innovations, Inc. is a software firm that develops and deploys i-INFO, which is used for dynamically sharing information and processes between organizations in a secure web environment.

Joint Commission Resources

Joint Commission Resources (JCR), a not-for-profit affiliate of The Joint Commission, is a dedicated expert resource for health care organizations worldwide, providing consulting services, educational services, and publications to assist in improving quality and patient safety and to help in meeting the accreditation standards of The Joint Commission.

Continuing Education

Our learners have a number of educational opportunities to advance their careers through online continuing education both at home and at work. Our course content consists of expert-authored lessons designed specifically for busy healthcare professionals. The following is a listing of the continuing education credits available.

Continuing Education

Emergency Preparedness
EMS CE from JEMS.....159.5 CECBEMS
